DETAILED ACTION

Claims 1-26 are pending in this application.

Action Summary

1. The rejection of claims 1-26 under 35 U.S.C 103(a) over Igo-Kemenes in view of Iosilevich is hereby withdrawn.
2. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Response to Arguments

3. Applicant's arguments with respect to claims 1-26 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 1, 9-15, 17 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Sato (US 6,488,945 B2) in view of Jou et al. (US 4,776,356).

Sato discloses a liquid cosmetic composition having a low-viscosity and a gellant. The gellant of the composition is an alkyl acrylate copolymer emulsion (see table 1, cols. 5 and 6). The composition also contain an inorganic pigment i.e. pearl pigments such as black iron oxide, yellow iron oxide, etc. (col. 3, line 30-37). The prior art does not teach the composition being contained in a non-rigid porous support.

Jou discloses a cosmetic applicator for use with low-viscosity liquid cosmetics. Column 3, lines 43-51, teaches that the applicator absorbs the composition in the semi-open cell part.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to incorporate the liquid cosmetic composition of Sato into the porous support of Jou. As previously mentioned Jou teaches the incorporation of low-viscosity liquid cosmetics into its applicator. Therefore, the combination of Sato and Jou discloses the claimed invention.

Allowable Subject Matter

5. Claims 2-8, 16 and 19-26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. Claims 1, 9-15, 17 and 18 stand rejected.
